fashion refresher  
**rundry**  
clothing care unit

www.rundry.co.kr

by yojadesign

You

**coveted**

an expensive  
clothes care system?

As you come home,  
get your clothes washed first.  
**NG DROMM style**

Is this wardrobe worth 2 million won?

It's nice,  
but do you know

**how**

its works?

Spray water and just jolt them,  
and clothes get tidy, right?

But, it's

**too big  
and expensive,**

right?

The size is reduced a little bit.

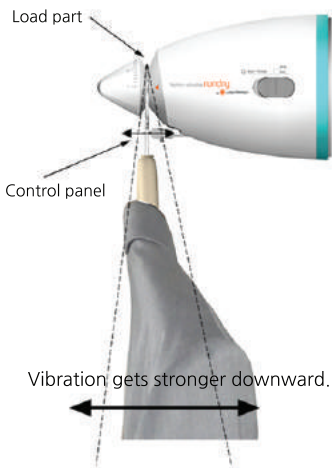

This is actual size ratio (price reduced as much).

spray water and shake?

# RUNDRY can shake!

water, use sprayer(sorry~)

There is no load on the control panel, so strong vibrations are delivered to the clothes with a small force.

## Business suit care

for deodorizing bad odors and smoothing out creases  
Powerfully shake off with strong vibration at 190rpm.

## Expensive jeans care

Expensive jeans care with protruding knees even after one day of wear

Use water spray and trousers hanger to smooth out the knees

## Dry soaked shirt for tomorrow after washing in the evening

Don't worry.  
It will completely dry in just one operation.

## Dry wet towels/socks

Dry wet towels/socks in your business trip instead of using hair dryer

From now on, hair dryers are for drying your hair only.

## Material guide for Rundry

Registration Date/Month/Year : 2015-06-18

## Tips for use

- Button around the neck before use.
- For creased laundry, shake off a couple of times before use.
- When using hemp garment or strongly creased clothing (e.g. back of business suit severely - creased from sitting in the driver's seat all day), spray sufficient amount of water and "crumple" the creased area by hands a several times before use.
- For trousers/socks/towels, use a separate trouser hanger.
- Noise may occur if the connection between product link and clotheshanger is too tight or too loose. In this case, lightly press or separate by thumb.
- For anti-bacterial effect, use a fabric deodorant.
- Garments with high content of water such as jeans may take a long time to dry.
- Crease removal function may vary depending on the garment properties. This product is not a substitute for an iron.
